# European Academy for Semantic-Web Education (EASE)

Enrico Franconi

# Ready to start

- We start (an experimental phase) from this academic year

- We call for European students willing to start a double degree European master

- Bolzano, Trento, Amsterdam and Madrid founding partners

- Students will be assigned a personalised studyplan

# Scholarships

- Students enrol to a first "local" university and go to a second university at the second year

- Students get <span style="color:red">two</span> MSc degrees

- <span style="color:red">Full-fledged scholarships</span> available from FUB (and possibly from other partners)

- An <span style="color:red">additional</span> scholarship on top of the local one is given to support the second year in the other university

- Enrolment possible until mid July (at FUB and VU)

# **Advertising**

- Web page: http://www.semantic-web-academy.eu
- We need to have everything in place soon
- By now, we can give the perspective students the deliverable:
  "D3.2.4 Joint curriculum for a shared masters program"

# Recruiting

- Advertise to your last year BSc students!
- Enrolment possible until mid July
- Several scholarships for European students available!
- Let's have students!

# Technicalia

- We exploit the Erasmus Socrates mechanism for the experimentation phase

- An initial (on day one of year one) agreement is signed by the two universities, personalising the (Erasmus Socrates-style) studyplan on a student-by-student basis

- The only difference wrt a standard Erasmus Socrates, is that the second university has to award the second degree

  - We have to find a way out to award the second degree.

  - Problem: it is forbidden for Erasmus Socrates students to be enrolled at the visiting university

- Who's doing the web page? See next page.

# Web Page

- Home page (FUB)
  - General description of the thing (FUB) (from Executive Summary)
  - Target audience (2.2) (FUB)
- What is the semantic web (VU)
  - bla bla from KWeb technical annex
- The studyplan (VU)
  - Structure overview (2.3 latex2html)
  - Detailed list of courses (3.3 latex2html)
- How to enrol (FUB)
  - Pointers to local contacts and local procedures
- Advertisment about locations (FUB+ALL)
- General contact (FUB) info@semantic-web-academy.eu
