The second International workshop on Ontology-Based Competency Modeling Frameworks

Maastricht (MECC), October 17th, 2007
As part of the Human Capital & Social Innovation Technology Summit

The workshop aims to bring together various approaches to competency frameworks, and compare them to existing/emerging standards from IMS and HR-XML. The speakers have been invited to briefly state the most important aspects of their framework in relation to the IMS and HR-XML standards. Subsequently a common workshop will interactively establish the overlaps between all approaches and produce a first draft of what could become a standards document. The results will be presented to the HR-XML track of the same Summit.

Session I (11:15 – 13:00)

1. Robert Meersman, STARLab/Vrije Universiteit Brussel, Belgium:
Update on the Ontology Outreach Advisory
2. Luk Vervenne, Synergetics/HR-XML Europe, Belgium:
Update on the HR-XML Standards
3. Andreas Schmidt, FZI, Germany:
A Methodological Framework for Building, Applying, and Updating Competency Ontologies
4. Tobias Ley, Know-Center, Austria:
Using Competencies in APOSDLE: a Competency Model based on Knowledge Space Theory
5. Clementina Marinoni, Fondazione Politecnico di Milano, Italy:
Competence and Job Profile Frameworks.

Session II (14:00 – 15:30)

Facilitated by Jeroen Hoppenbrouwers, STARLab/Vrije Universiteit Brussel, all speakers and as many other attendees as possible will discuss and produce a preliminary sketch of a common framework that can serve the HR industry in the near future. The setup is interactive and a true workshop, where active participation is highly encouraged.

Session III (16:00 – 17:30)

Merged with parallel track on HR-XML to present and discuss the results of Session II.

If you want to attend this workshop, please **register at the main web site of the Summit:**
